Intended use

The Switching element with locking mechanism HST-S2 is used to switch off the power supply to the load circuits of machines or plants without shutoff delays, with rated currents up to 20A.

Other applications are prohibited.

Structure and function

Position 1:
All keys cannot be removed.

Position 0:
All keys can be removed one after the other.

Technical Data

Environment: Indoor / outdoor
Temperature range: -25°C to + 40°C
Humidity: to 100% (standard climate)
Material:
Lock: stainless steel
Mounting plate: galvanised steel
Earthing plate: galvanised steel
Housing: powder-coated sheet steel
Ambient atmosphere: industrial environments
Mounting position: all positions
Mechanical service life:
Lock: 280.000 actuations
Switch: 1.000.000 actuations
Service life: 15 years
B10d-values:
Switch; rated operating current 16/20 A: 36.000 switching operations
Switch: for 24 V DC and 0,21 A: 1.000.000 (in conjunction with PNOZ X3)
Mean Time To Failure (MTTFd): Application-dependant
Protection class: IP 2x
Reference standard for rotary switch: EN 60947-3

Dimensions Ident.-No: 10225
